- A lot of the weather concept involve movement of air and what not. I personally think you walking through a diagram and drawing on the diagram where stuff goes would really help make some concepts easier to follow.
- I enjoyed taking this course and would take another class with this professor.
- I like her method of teaching.
- N/A
- Try to talk a little bit slower and stay on the slides longer, I had a hard time keeping up writing notes because we would only be on each slide for ~5 seconds and then end up with a lot of time at the end.
- a little slow
